EXPERIENCE ACROSS KEY SEGMENTS OF INNOVATION VALUE CHAIN

Cognizant Technology Solutions US Corp – Lake County, IL

Program Manager; Designation - Associate Director, Lifesciences/Medical devices; Mar 2015 to till date

Program Manager; Designation – Senior Manager, Lifesciences/Medical devices; Dec 2015 to Feb 2022

Project 1, Incremental Innovation (Digital Transformation)

- Situation: To identify ways to optimize application in congruence with growing business needs
- Task: Investigate and Recommend Incremental Updates
- Action: Understand Business and Application landscape, review key findings, perform feasibility analysis and finalize updates to optimize application
- Result: Recommended Enhancements for next 18-24 months adhering to Client transformation strategy

Project 2, Consulting / Execution Strategy (Digital Transformation)

- Situation: Understand Direct Distributor Business Model, Process and Means to enable involved teams to manage the business
- Task: Assess and Understand Business / IT landscape of Direct Distributor Business to recommend One Distributor Management Solution
- Action: 1. Reachout – To key teams / stakeholders across the regions (global) 2. Assimilation – Collate information in a structured manner 3. Evaluation / Assessment – Analysis of key findings and assessment of outcomes 4. Create / Conceptualize, optimal framework conforming to key learnings
- Result: Presented Detailed Assessment Report; Recommended One DMS Solution (potential modules) and Execution strategy / Roadmap to IT and Business teams; aligning with informed IT and Business expectations

Project 3, Delivery / Program Management (Digital Transformation)

- Situation: Complete business-critical releases (~8) for a Quality / Validated application within first 6 months of calendar year
- Task: Understand business criticality, requirement alignment and execute via robust implementation strategy
- Action: Designed and executed releases parallelly via hybrid methodology, by creating new development environment and complying SLC approach
- Result: Completion of all releases within stipulated time without any quality compliance issues

Cognizant Technology Solutions, India – Chennai, India

Consulting Solution Architect – Oct 2012 to Nov 2015

Project 1, Connected Care – Remote Patient Monitoring (Disruptive Innovation)

- Situation: To showcase IoT capabilities in partnership with tier 1 SW Product company, in 2014 HIMMS conference
- Task: Conceptualize and create a connected care platform with clear-cut USPs using product company's devices and cloud infrastructure
- Action: Review / evaluation of use-cases (with focus on USPs); Preliminary design for finalized use-case (with feasibility analysis); Requirement and Design analysis; Development and Verification

- **Result:** Connected care platform that collates information across the devices and display key metrics related to vitals in a dynamic and timely manner. Successful launch in 2014 HIMMS Conference; Pilots performed for 2 Tier 1 companies and Full-fledged solution executed in one of the clinics of Tier 1 Healthcare companies

Project 2, Web Analytics Platform (Disruptive Innovation)

- **Situation:** One of the top 3 biopharma companies intended to understand trends in webspace for a niche indication
- **Task:** Understand therapy area, evaluate different forums / social media vehicles, patient / caretaker groups and behavioral / treatment patterns; propose a platform with specific set of reports / dashboards
- **Action:** Collaborated with Cognizant BI technology practice; reviewed and finalized set of reports / dashboards; developed and presented a Proof of Concept
- **Result:** Designed and developed full-fledged platform at an asia-pacific level and enabled regional marketing team to track the trend, thereby enabling relevant brand teams to design tailored product and digital strategy
